

Step 1: Choose Your Coverage Level

Step ① ② ③

- Simply add up your major wedding expenses (reception, attire, photographer/videographer, flowers, music, etc).
- Use the chart to select the level that best protects your wedding investment.
- Please note the options in each coverage level cannot be altered. If your spending is higher in certain categories (for example, your attire) you may wish to choose a higher level of coverage. Default is Level 1.

Step 2: Consider Liability Coverage

Step ① ② ③

Would you like to add Liability Coverage?

Liability Insurance can provide coverage for liability for property damage and personal injuries to third parties at the location of your ceremony and reception. For example, if a guest slips and falls at your wedding, the policy can provide coverage for your liability. Even if you have homeowners insurance, it may or may not cover you in these instances. Plus, some event locations require you to get your own liability coverage.

You have the option of selecting from one of the three levels of coverage:

- \$1,000,000 Liability with \$25,000 Property Damage.
- \$1,000,000 Liability with \$250,000 Property Damage.
- \$1,000,000 Liability with \$1,000,000 Property Damage.
